

Maximize Your Assets: DCU, FCC, SRU, I&E PEOPLE, EQUIPMENT, PROCESSES, EXPENSES

Seeking Sulfur Speakers

What would you like to share? We are seeking presenters, discussion leaders and work group subject matter experts. What has your refinery done that dealt with a nagging problem that is novel and inventive, or that reworked a standard way of operating? We'd like to hear about it. (Presenters from operating companies save 50% on registration).

This is RefComm®

After a decade of successfully hosting the Coking.com Safety Seminar, [RefComm®](#) expanded into the Fluid Catalytic Cracking arena. The conference expands further in 2016 to include **Sulfur** for operating efficiently and meeting regulations. Overlapping these process units, is a new track I&E (Instrumentation & Electrical).

RefComm® Galveston May 2-6, 2016

Coking, CatCracking, Sulfur, Instrumentation & Electrical

Email your abstracts and ideas to [Becky Peterson](#)
